# What is the **Super** key?

When you press the **Super** key, the Activities overview is displayed. This key can usually be found on the bottom-left of your keyboard, next to the **Alt** key, and usually has a Windows logo on it. It is sometimes called the *Windows key* or system key.

If you have an Apple keyboard, you will have a  (Command) key instead of the Windows key, while Chromebooks have a magnifying glass instead.

To change which key is used to display the Activities overview:

1. Open the **Activities** overview and start typing Settings.
2. Click on Settings.
3. Click Devices in the sidebar.
4. Click Keyboard in the sidebar to open the panel.
5. In the System category, click the row with Show the activities overview.
6. Hold down the desired key combination.

## See Also

**Useful keyboard shortcuts** — Get around the desktop using the keyboard.

You can choose the **displayed language** by adding a language suffix to the web address so it ends with e.g. `.html.en` or `.html.de`.  
If the web address has no language suffix, the preferred language specified in your web browser's settings is used. For your convenience:
